

⚡ MOUSTIFUCK (\$BZZ) — WHITEPAPER OFFICIEL V1 → V2 ⚡

“From the chaos of Pump.fun to the order of Swarm.”

● 1. INTRODUCTION ●

MOUSTIFUCK was born from chaos.

A sarcastic, raw, and unfiltered memecoin launched on Pump.fun, Solana's most unpredictable jungle—and yet it survived.

But MOUSTIFUCK was never intended to be a mere passing fad.

From the start, the goal was clear:

to create a vibrant community, remain 100% transparent,
and evolve into a structured, useful, and sustainable ecosystem.

🔥 Crypto has become too serious.

Too clean.

Too controlled.

And we, children of the '80s, grew up with the spirit of true chaos:
raw creativity, dark humor, total freedom.

MOUSTIFUCK brings that energy.

It stings where it hurts.

But unlike real chaos, it lays the foundation for a clear project:

utilities, tools, charity, governance, and security.

From meme chaos to controlled evolution —

the swarm is rising.

2. TOKENOMICS V1 (CURRENT— PUMP.FUN)

Total Supply : 1,000,000,000 \$BZZ

Allocation	Percentage	Description
Liquidity	91 %	Added to Pump.fun. 100% public, transparent, and verifiable.
Development	5 %	Development of tools, the bot, and communication.
Airdrop	3 %	Airdrop Community rewards.
Burn	1 %	Sent to a verifiable burn address. No automatic burn or tax on V1.

 **No hidden mints, no taxes, no empty promises in V1.**

3. EXIT STRATEGIE / (PUMP.FUN → V2)

The Pump.fun launch was a test.

But the limitations are real: no automated burn, no taxes, and no liquidity control.

To scale, MOUSTIFUCK needs to create a separate SPL contract and migrate to a full V2 version.

PROCESS

Step	Action
1. Snapshot	Registration of all V1 holders
2. Déploiement	Launch of the verified and open-source V2 contract
3. Redistribution	Equitable allocation based on ownership percentage
4. Burn V1	Symbolic destruction of the initial contract

V1 will be our cocoon. V2, our flight.

🧩 4. TOKENOMICS V2 (ÉVOLUTION) 🧩

The Total Supply V2 is determined at the time of migration from Pump.fun.

To guarantee a healthy, transparent, and sustainable foundation, an initial burn of \$10,000,000 BZZ will be performed upon V2 release.

This burn represents 10% of the supply, permanently removed, visible, and verifiable on-chain.

4.1. INITIAL BURN– 10 000 000 \$BZZ (10 %)

This massive burn strengthens:

- the token's scarcity,
- the project's credibility,
- community trust,
- the commitment to avoid excessive concentration.

The burn will be publicly announced and verifiable on Solscan.

4.2. TOTAL SUPPLY ALLOCATION V2

Once the initial burn is complete, the remaining supply is allocated according to the following scheme:

Allocation	Pourcentage /	Description
Liquidity	55 %	Stability, market depth, dump protection Community & Rewards
Community & Rewards	20 %	Raids, contests, proprietary airdrops, incentives Charity Fund
Charity Fund	5 %	Support for actions against mosquito-borne diseases Development & Tools
Development & Tools	10 %	Panel development, randomizer, community tools
Team Wallet (locked)	5 %	Creator's wallet + development, locked for transparency
Marketing	5 %	Growth, partnerships, visibility

This structure ensures a balanced, sustainable, and community-oriented project.

4.3. TAXES – SUSTAINABLE TURNOVER

To support the project's growth and fund essential activities, a lightweight and transparent tax system will be implemented:

→ TAXE : 2 % BUY / 2 % SELL

These taxes, among the lowest on the Solana market, are used to maintain a healthy turnover:

Wallet	Percentage	Rôle
Charity Fund	0.5 %	Charitable funding (mosquito nets, prevention, etc.)
Burn	0.5 %	Regular burn and maintaining scarcity
Development Fund	0.5 %	Tools, panel, community utilities
Marketing	0.5 %	Raids, collaborations, visibility

All wallets linked to taxes will be **public** and verifiable.

4.4. TOKENOMICS PHILOSOPHY

MOUSTIFUCK follows a simple policy:

- zero hidden mints,
- zero manipulation,
- zero bullshit,
- clear and verifiable supply,
- fair redistribution,
- community governance.

Each token has a purpose, every expenditure is transparent, and every burn is verifiable.

5. ROADMAP — FROM CHAOS TO CONTROL (2025 → 2028)

Phase	Title	Périod	Description
1.	The Sting	Q4 2025	 Launch on Pump.fun, website, branding, first sarcastic tweets.
2.	The Swarm	Q1 – Q2 2026	 Community building (Telegram, Discord, X).
3.	The Takeoff	Q3 2026	Contract V2 preparation, communication, snapshot, and testing.
4.	The Mutation	Q4 2026 – Q1 2027	 Migration off Pump.fun, official launch of \$BZZ V2, V1 burn. / Official migration & token redistribution.
5.	The Hive	Q2 – Q3 2027	 Déploiement des outils, NFT, mini-jeux, gouvernance. / Expansion and ecosystem launch.  Deployment of tools, NFTs, mini-games, governance. / Expansion and ecosystem launch.
6.	The Sting	Q4 2027 – Q1 2028	 Final burn, first CEX/DEX listings. / Final burn and major exchange listings.

Each phase is a metamorphosis. The mosquito evolves, but never dies.

6. SECURITY & TRANSPARENCY

Audited Contract (V2)

The V2 SPL contract will undergo an independent audit.

The full report will be made public.

Locked Liquidity (V2)

V2 liquidity will be locked for a defined period.

No Hidden Mint

The V2 contract will not allow:

-  any additional mint
-  any creation of new tokens
-  any manipulation of the supply.

The supply is defined, fixed, known, and immutable.

Public Wallets

All wallets linked to the project will be documented.

On-Chain Tracking

Everything will be tracked:

- burns,
- transfers,
- donations,
- taxes,
- initial distribution,
- V2 redistribution.

No manipulation is possible.

The blockchain never lies.

RESULT:

MOUSTIFUCK's security rests on 6 pillars:

1. Independent audit
2. Open-source contract
3. Locked LP
4. No possibility of minting
5. Public wallets
6. Community governance

You ensure that your project:

- ★ inspires trust
- ★ is impossible to rip off
- ★ is completely transparent
- ★ remains 100% aligned with your style: honest, raw, no bullshit

7. CHARITABLE COMMITMENT – MOUSTIFUCK FOR HUMANITY

Mosquitoes bite, but they can also **protect**.

Starting with version 2, MOUSTIFUCK is committed to supporting real actions against mosquito-borne diseases worldwide (malaria, dengue fever, Zika).

This commitment will be made in a simple, transparent, and verifiable way.

♦ OBJECTIVES :

- Provide mosquito nets through reputable organizations (AMF, UNICEF, MSF).
- Participate in prevention programs.
- Help the regions most affected by deadly mosquitoes.
- Publish every donation with Solscan proof.

♦ FUNDING:

1% of the Marketing Fund and community donations will be allocated to these actions.

Every contribution → on-chain proof → total transparency.

♦ VISION :

To make MOUSTIFUCK the first charitable memecoin dedicated to the fight against mosquitoes in the real world.

8. OFFICIAL BURN – 10 MILLIONS \$BZZ

To reinforce the token's scarcity and maintain a healthy balance in V2, MOUSTIFUCK is planning a massive **burn of 10,000,000 \$BZZ**.

This burn will be conducted publicly, verifiable, and accompanied by a pre-announced Burn Event.

WHY BURN 10M?

- Reduce the initial supply.
- Increase scarcity.
- Avoid any risk of internal whales.
- Demonstrate the project's complete transparency.
- Send a strong message: "**Moustifuck isn't here to cheat, but to last.**"

PROCESS :

- Burn voted on by the community.
- Public transaction on Solscan.
- Burn in one go or in several stages depending on the Swarm vote.

The burn will not be hidden, but celebrated.

9. GOVERNANCE – THE SWARM DECIDES

MOUSTIFUCK belongs to its community.

V2 introduces participatory governance:

The Swarm will vote on:

- the burn rate
- priority utilities
- partnerships
- charitable actions to support
- future NFTs
- the overall direction of the project

It's a memecoin, but it's also a **grassroots democracy**.

No one controls Moustifuck.

The Swarm does.

10. TOOLS & UTILITIES (UTILITY V2)

Although MOUSTIFUCK was born as a memecoin, its V2 will integrate simple, realistic, and useful tools for the community.

1. ON-CHAIN RANDOMIZER

Transparent randomization tool for contests, airdrops, and Swarm events.

2. SOCIAL PANEL (SWARM PANEL)

Simple dashboard:

- Raid tracking
- Community rankings
- Social statistics
- Activity score

3. BROWSER EXTENSION (OPTION V2+)

Small online tool:

- Price tracking
- Alerts
- Watchlist

4. \$BZZ UTILITY PASS

Exclusive access for holders:

- Private lobbies
- Early airdrops
- Important votes
- Events

These tools will be developed gradually, with transparency and realism.

11. NFT COLLECTION – 1,000 COPIES

A limited collection of **1,000 Moustifuck NFTs** will be launched to support the community and fund charitable initiatives.

STRUCTURE :

- **600 Common**
- **300 Rare**
- **80 Legendary**
- **20 “Guardian Mosquito” (1 NFT = 10 mosquito nets funded in Africa)**
- **1 “Queen Sting” NFT (absolutely unique)**

BENEFITS:

- Exclusive access
- Special roles
- Bonuses in tools
- Priority during airdrops
- Enhanced governance

12. LONG-TERM VISION

To make MOUSTIFUCK an evolving, funny, edgy, yet transparent memecoin—a project that blends humor, art, utility, and real impact.

To build an ecosystem where the community decides, where every tool serves the Swarm, where NFTs strengthen identity, and where a portion of our actions supports the fight against mosquito-borne diseases.

To combine creativity, controlled chaos, and total transparency to create a sustainable, unique, and uncopiable project.

13. FINAL COMMITMENTS – NO BULLSHIT POLICY

MOUSTIFUCK is committed to remaining:

- **0 hidden fees**
- **0 supply chain manipulation**
- **0 rug pulls**
- **100% transparent**
- **100 % on-chain**
- **100 % community-first**
- **Some of the lowest Solana fees (2% buy / 2% sell)**
- **Public, verifiable wallets managed transparently**
- **Fees are not used to enrich any individual or manipulate the market.**

They are solely used to ensure the project's operation, fund tools, support charitable activities, and fuel the Swarm's growth.

MOUSTIFUCK doesn't promise the impossible.

It promises to be honest, clear, and true to its vision.

🧠 14.FINAL QUOTE 🧠

*“From the ruins of our past years to the frenetic pace of an over-connected world, and toward the uncertainties of an accelerating future, one truth remains: we are moving forward together. **MOUSTIFUCK** is not simply an act of rebellion.*

It is a promise: a promise of transparency, of community, and of a controlled chaos that refuses to submit.

For our children, and those who will come after us, we are building a bridge between disorder and clarity, between instinct and technology, where every voice guides the swarm.

Join us.

And buzz after buzz, let's build a decentralized future that never apologizes for existing.

I am MOUSTIFUCK.”
